

baulogis GmbH

Founded in 2000 in Munich, baulogis GmbH is an internationally expanding company marketing an internet-based software solution for efficient information and project management in the construction and real estate industries. Among its customers in Germany and abroad are renowned clients, investors, project developers, project controllers, project managers, architecture and engineering firms, and construction companies. think project! brings together all project-relevant data – from the tendering, planning and execution phases through to ongoing facilities management and maintenance – on a single platform.

All project partners can access the latest information any time, any place. Regulated communication and coordination processes between project members ensure an accelerated flow of information and optimise project collaboration. By facilitating secure access to comprehensive, traceable and tamper-proof documentation, think project! makes a significant contribution to complex, multi-party projects by increasing efficiency and minimizing risks. Any process can be mapped without any programming. Standard modules are also available for a range of processes, such as design and document management, defect tracking, tendering and facilities management – and they can be combined and expanded to meet specific project requirements.

baulogis markets think project! in Germany and through its subsidiary think project! International worldwide.

think project! International, which is responsible for product development, is aiming to establish think project! as the standard for online project collaboration solutions for the construction and real estate industries worldwide. The software is currently available in 19 languages and is being used in over 5,000 projects around the world, of which approximately 1,500 are in Germany. More than 90,000 users in 40 countries are already working with think project!.
